WORK EXPERIENCE

Internship (9 months) - Engineer Trainee

Getcon - <https://www.getcon.com/hu/fooldal>

📅 Aug 2023 - Apr 2024

📍 Budapest

- Supported the deployment and management of various IT solutions, including servers, networking equipment, or cloud services.
- Worked closely with a senior Network Security Engineer who acted as a mentor, gaining valuable insights into networking best practices.
- Assisted in the optimization of existing systems for better performance and reliability.
- Participated in IT projects, such as system upgrades or migrations.
- Learned about the design, configuration, and maintenance of IT infrastructure.

PROJECTS

Developer Portfolio

To get to know me & my projects better !

📅 Okt 2023 - current

- Visit here: betterbyte.net
- On my website, I've created in-depth blogs detailing the problems I encountered and the solutions I implemented throughout my projects, along with sections showcasing various features.
- Tech used: Tailwind, React, Javascript, HTML, CSS, Firebase Serverless

Fullstack - Skin Cancer Detection App

Web | Mobile

📅 Jan 2024 - current

- Web Frontend: React.js, Typescript, Next.js, HTML, CSS
- Mobile Frontend: React Native, Typescript, Expo
- Backend: Go, Python, Flask, AWS EC2, Docker, Firebase Auth, Firebase Database
- Machine Learning: Tensorflow, Python, ISIC Database, Numpy
- API's : Open AI, OpenWeatherMap, Stripe, Google Auth
- Github: <https://github.com/orbant12/PocketProtect>

EDUCATION

B.S.

Computer Science

Vrije Universiteit Amsterdam

📅 September 2024 - current

📍 Amsterdam, NL

CAREER OBJECTIVE

Motivated and passionate individual with a strong interest in cybersecurity, application development, and machine learning. Recently completed a one-year internship, gaining hands-on experience and practical skills before starting college. Eager to leverage technical knowledge in cybersecurity, software development with machine learning solutions to contribute to innovative projects and enhance organizational security and technology practices.

SKILLS

- JavaScript
- TypeScript
- HTML
- CSS
- React.js
- React Native
- Node.js
- Next.js
- Go
- Python
- C++
- Docker
- Linux
- Tailwind

Fullstack - Clippify

Web

2023 March - current

- I built this **web app** because I love listening to podcasts, but I wanted a better way to **remember and take notes** on the valuable parts. This app allows you to **create clips from YouTube videos** or **uploaded** content, take notes, and **extract transcripts** using an integrated **Recurrent Neural Network**. It also features an **OpenAI API** that can read the video transcript, allowing you to **prompt** it for insights about your clips.
- Frontend: React.js, Javascript, Vite, HTML, CSS
- Backend: Node.js, Python, Firebase, Flask, FFMPEG
- Machine Learning: Python, Tensorflow
- API: Stripe, Open AI
- Github: <https://github.com/orbant12/Clippify>
- WWW: clippify.online

- Git
- AWS
- Firebase
- SQL
- Tensorflow
- Flask
